

# FW Oliver HD Megapack

<b>Product Name:</b>	FW Oliver HD Megapack
<b>Product ID:</b>	19560
<b>Published Artist(s):</b>	Fred Winkler Art, Fisty & Darc
<b>Created By:</b>	N/A
<b>Release Date:</b>	2014-08-14

## Product Information

- Required Products: [Michael 6](#)

Oliver is a high quality character, hair and accessories Megapack for Michael 6 for the use in DAZ Studio 4.6 and up and Poser 9 and up.

The head, body, navel and nipples are uniquely custom sculpted in Zbrush, and the skin was created using high quality photo references for depth and detail. He also comes with genital textures. The Body and Head come in an HD version as well, that can be applied and removed manually. Nipples and Navel can also be applied and removed manually.

He also comes with seven very cool Expression that can be applied via the library or using the specially created dials.

The Oliver hair is also included, a shaven hairstyle that will look great on him or any of your Genesis 2 Male characters. The hair comes in eight colors, and there is a lighter (freshly shaven) or darker (slightly grown out) version of the hair. And of course no modern guy should be without bling, so we included a Ear Piercing, a bracelet and a very modern style ring. These again will fit perfect on Oliver, but also on all other Genesis 2 Guys. All accessories are designed for you to add your own shaders to them without effecting the great look.

Sure that's enough already.... no it isn't. Just for good measures we also included some very cool and funky thongs, cause even guys want to show of their behind sometimes. Especially when their behind got a tattoo on it. The thong comes in nine different colors, ranging from very subtle to totally out there. So whether you're looking for a sports fan, an athlete, a city boy, the bad guy, the hunk next door.... Oliver has you covered.

Also included are character lights and render settings for DAZ Studio helping you achieve fantastic looking renders.

## Product Notes

### Installation Packages

Below is a list of the installation package types provided by this product. The name of each package contains a [Package Qualifier](#), which is used as a key to indicate something about the contents of that package.

- 1 Core <sup>1)</sup>
- [1 PoserCF]

Not all installation packages provide files that are displayed to the user within the interface of an application. The packages listed below, do. The application(s), and the location(s) within each application, are shown below.

## Additional Details

- README for Character Lights
  - The character lights included in the DAZ Studio version (found in the MATs folder) are designed to work perfect with the character as well as accessories materials. They are set to a cold light, perfect for a more vibrant atmosphere, however if you want a more warmer theme, or you don't like the turquoise light, simply change the light labelled "Rim" to a different color, nothing else needs changing.
- README for Hair
  - Due to the different ways Poser and DAZ Studio work, the hair cannot be as snug fit as we'd ideally would like it. For that reason we added a lot of adjustment morphs helping you get the perfect snug fit. Alternatively in Poser, the morphing brush will ensure you have the snug fit in no time.
- A detailed User Guide and Tutorial can be found here:
