## Product Information

- Required Products: *None*

Have you ever heard the expression, “Combining the useful with the pleasant?” There is a meaning to this, and in the digital world, it is not that different when it comes to joining other 3D platforms. I

present to you my new collection, Fantastic and Enchanted Trees. Imagine the versatility we currently have exporting, converting, and transposing your favorite 3D models from other software to Daz Studio!

In some of the promos of my new product, I used Quixel Mixel and Cinema 4D with extension (.fbx).

Software such as Cinema 4D, 3D Studio Max, and Blender use fbx and export to obj.

Do you want to create beautiful scenes for the next level of realism? Fantastic and Enchanted Trees is for you.
