

Face Transfer 2 - How To

Face Transfer 2 - an AI-powered system that, from a photo, transfers face shape and texture to create a look-a-like 3D version of family members, yourself, really whomever you want! It is compatible with Genesis 9 figures, employs higher-resolution texture maps, refines the image projection process, and improves dynamic geometry adjustments.

Skills you will learn in this video are...

- Choosing an appropriate source image
- Choosing a figure base: Auto, Genesis 9, Genesis 8
- Choosing a figure gender: Female, Male
- Applying to an existing (selected) Genesis 9 figure
- Generating on a new Genesis 9 figure
- Saving results for reuse
