FEMALE

60 ultra realistic face dials.
Mix face dials together to create an infinite array of new characters.

Simple to use characterization system that takes only seconds.

Ultra Morphs – 60 Essential Faces

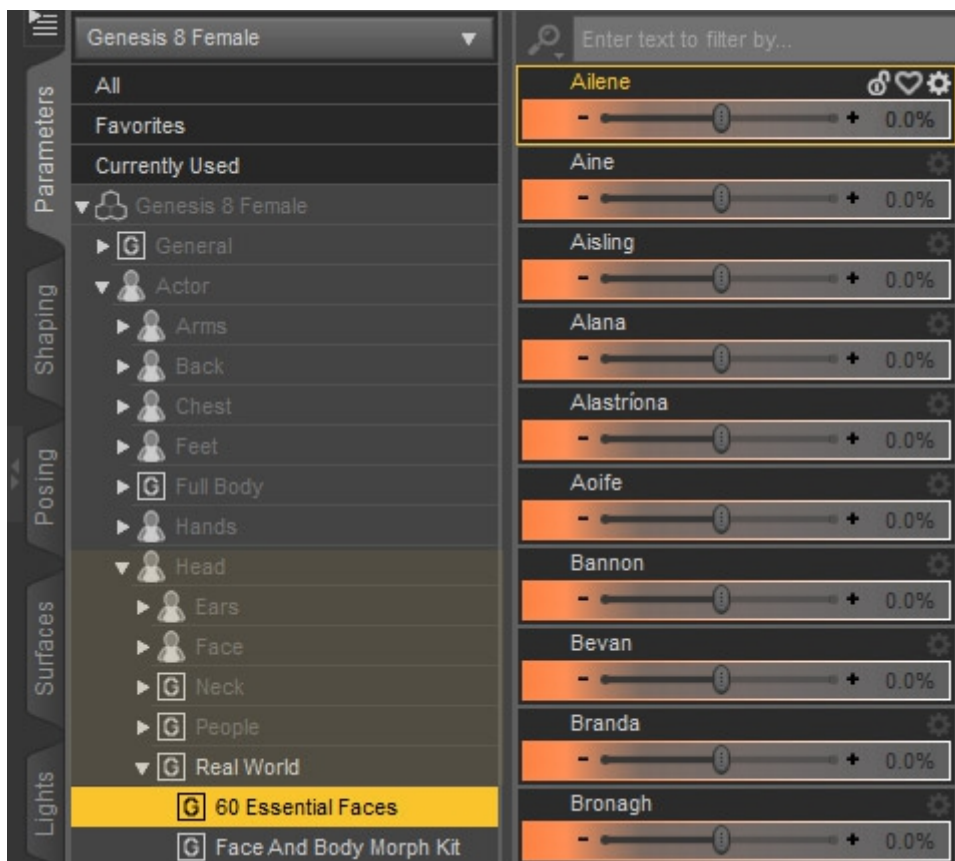

User-guide

Welcome to the **Ultra Morphs – 60 Essential Faces - User Guide**.

'**Ultra Morphs – 60 Essential Faces**' is a set of 60 custom face dials for the Genesis 8 Female from Daz 3D.

To use the **60 Essential Faces just** load up your Genesis 8 Female figure in to your scene and use the provided face dials that you will find in the 'Parameters' tab of the Genesis 8 Female figure. Just open the 'Actor' drop-down on the figure and scroll down to 'Head/Real World' and open that. There you will find a new category called '**60 Essential Faces**'. Open that and you will find 60 new dials added to your Genesis 8 Female figure. Adjust the sliders of any dial to see the face appear on the figure. You can mix these dials in increments of your own choice to create your own custom faces. You can also mix them with any other Daz morph or character that you have installed on your figure. This will give you an endless array of characters that you can add to your figure creating totally original looks.

You will also find a '**Reset All Face Morphs**' preset in People/Genesis 8 Female/Shapes/Ultra Morphs/60 Essential Faces.

That about wraps it up. I sincerely hope you enjoy using

Ultra Morphs – 60 Essential Faces.

Have fun rendering.

A handwritten signature in black ink that reads "Colin". The letters are fluid and connected, with a cursive style. The "C" is large and loops around the "o", and the "l" and "i" are also connected. The "n" is a simple, slightly curved stroke.
