

Here I've included the names of the hair, outfits, and skin textures I used in the promos and thumbnails.

In some cases, hair or clothes may have been re-textured, or had dForce or Mesh Grabber used for realism. At times, the translucency was adjusted for the skin.

But if you would like to recreate the characters as I've shown them in the promos, it should be possible using the head morphs from this Diverse World set in combination with the skin textures, hair, and wardrobe listed below (not included in this package).

01 - Elena
