

VIEWPORT

You can get instant access to search and download videos with this link:-

<https://app.searchie.io/playlist/PdODDGDoy2>

I have organised this as a playlist, with three parts:-

Part 1 : The Introductory Session (37 minutes)

Part 2 : Main session with remaining theory (29 minutes)

Part 3 : Practical demonstrations in DAZ Studio (1 hour 40)

How to Download the Tutorials

Start to play the video and you'll see the download symbol in the bottom right of the screen.

How the Searchable Videos Work

The image shows a video player interface with a search bar at the top right containing the text "Blender". Below the search bar, three search results are displayed with timestamps and text snippets. The first result is at 07:10, the second at 19:30, and the third at 23:53. The video player shows a 3D model of a man's head and shoulders. The video progress bar at the bottom indicates the video is at 37:45 of a 1:52:53 duration. A download icon is visible in the bottom right corner of the video player. Four callout boxes provide instructions: "Use the search icon in the top right" points to the search bar; "Playback quality and optional captions" points to the settings gear icon; "Use this icon to download the MP4 video file" points to the download icon; and "Timeline with the search hits displayed" points to the video progress bar.

Use the search icon in the top right

07:10 And we've got third Genesis, three version of that as well. I won't go through all of them. There they are. So this is great as a beginner. If you don't know how to do Wolf, if you don't know how to create your own morphs, like when I talk about later on with **blender**, this is absolutely fantastic starting point to create that unique character,

19:30 And the third way to do it is used **blender** to create our Moss. And the reason why I'm going to use **blender** is because it's free, which is good. If you've got access to zebra, shh, or another 3d modeling software, if you've got experience with that, absolutely amazing zebrafish is the standard. Obviously it costs a lot of money to use that hand.

23:53 Otherwise the import, the import won't work

Timeline with the search hits displayed
